RECENT PROJECTS

Cut to the Point: Video Deposition Trimming and Management App ([GitHub](#) | [Demo](#))

- Designed for the legal industry. Users can trim video clips, organize them, and download them or add the videos to a PowerPoint deck. Matching transcript text is also used if provided. File storage on AWS.

Workflow Automations: Scripts to automate design production processes ([Demos](#))

- Streamlined workflows by developing scripts to automate production processes. Examples include an export script for layered graphics and a deposition slide generator. Solutions add visible text as keywords to jpegs for searching.
